

First Quarter 2018 April 25, 2018

TOROMONT ANNOUNCES RESULTS FOR THE FIRST QUARTER OF 2018 AND QUARTERLY DIVIDEND

Toromont Industries Ltd. (TSX: TIH) reported financial results for the first quarter ended March 31, 2018.

	Three months ended March 31											
millions, except per share amounts		2018		2017	% change							
Revenues	\$	676.8	\$	412.3	64%							
Operating income	\$	49.2	\$	37.9	30%							
Net earnings	\$	30.8	\$	27.0	14%							
Basic earnings per share ("EPS")	\$	0.38	\$	0.34	12%							

The Company was pleased with the results for the first full quarter following the significant acquisition completed late last year. While maintaining a strong commitment to serve customers, focus remained on the integration of the newly acquired businesses and the Company was pleased with the progress achieved. The Equipment Group teams achieved growth in revenues, which together with the strong bookings, backlogs and service work-in-process levels, point to the increased activity levels seen this year. CIMCO continued to execute very well in Canada.

First Quarter Highlights:

Consolidated results

Net earnings increased \$3.8 million or 14% in the quarter versus a year ago to \$30.8 million or \$0.38 EPS. The following table identifies the components of contributions to Q1 results versus a year ago:

	Net ea	rni	ings	%	Basic	EP	S ^(a)	%
millions, except per share amounts	Q1 '18		Q1 '17	change	Q1 '18		Q1 '17	change
Legacy Toromont (b)	32.1	\$	27.0	19%	0.41	\$	0.34	19%
Toromont QM (c)	5.0		-	-	0.06		-	-
Acquisition-related interest expense (e)	(5.1)		-	-	(0.06)		-	-
Integration-related costs (e)	(1.2)		-	-	(0.02)		-	-
Dilutive impact of acquisition shares (d)	-		-	-	(0.01)		-	-
As reported	\$ 30.8	\$	27.0	14%	\$ 0.38	\$	0.34	12%

- (a) Separately identifies impact of shares issued at acquisition for year-over-year comparability
- (b) Defined as all businesses continuing from prior to the acquisition
- (c) Defined as all business acquired October 27, 2017
- (d) EPS impact of 2.2 million shares issued on acquisition to total net earnings
- (e) Expenses shown net of taxes

Earnings in the legacy Toromont businesses ("Legacy Toromont") increased 19% in the
first quarter versus a year ago on growth in both the Equipment Group and CIMCO. The
businesses acquired in October of 2017 ("Toromont QM") contributed \$5.0 million with
contributions from the mining and power systems segments. Integration-related costs
included severance and other one-time-only costs and combined with interest expense
on the acquisition financing, reduced net earnings by \$6.3 million versus a year ago.

Equipment Group

- Revenues increased \$253.2 million or 70% to \$613.0 million versus last year. Legacy
 Toromont revenues increased 3% on growth in product support and rental revenues,
 partially offset by lower total equipment sales. Toromont QM contributed \$241.4 million in
 the quarter, which increased 18% from revenues generated in the first quarter of 2017 at
 the predecessor organization on growth in new equipment and product support.
- Operating income was up \$10.7 million. Legacy Toromont increased \$5.0 million or 14%, which represented a 110 basis points increase in operating income margin. Toromont QM contributed \$5.7 million, net of integration-related costs of \$1.7 million.
- Bookings in the first quarter of \$370.0 million were up 97% over last year, including \$157.0 million from Toromont QM. In total, order bookings were strong across most market segments. Backlogs were \$437.0 million at the end of March 31, 2018, including \$184.0 million at Toromont QM. Most of the orders in backlog are expected to be delivered this year.

CIMCO

- Revenues increased 22% to \$63.9 million from a year ago mainly due to strong package sales growth in Canada. Product support revenues decreased by 3%. Operating income increased 21% to \$3.4 million and was 5.4% as a percentage of revenues.
- Bookings were down by 5% in the quarter to \$60.0 million. In Canada, strong industrial orders were partially offset by lower recreational orders while in the US, both market segments contracted against record levels achieved last year. Backlogs of \$157.0 million were at a new high for the end of a first quarter, and up from \$134.0 million at December 31, 2017 and \$138.0 million at this time last year. Most of the backlog is expected to be delivered this year.

Financial position remains strong

- Toromont's share price of \$55.93 at the end of March 2018 translates to a market capitalization of \$4.5 billion and a total enterprise value of \$5.1 billion.
- Toromont maintained a very strong financial position. Leverage as represented by the net debt to total capitalization ratio at March 31, 2018 was 33%.
- The Board of Directors announced a quarterly dividend of 23 cents per common share, payable July 3, 2018 to shareholders of record on June 8, 2018. The quarterly dividend was previously increased 21% to 23 cents per share effective with the dividend paid April 2, 2018.

The Company is encouraged by the long-term outlook for infrastructure investment from the federal and provincial governments. Momentum remains good in the mining sector. The sustained momentum at CIMCO reflects its strong market presence and solid reputation as a leader in the markets it serves. Though much work lies ahead, inroads are being made in expanding CIMCO's U.S. presence. Across the organization, long-term product support growth trends, together with diversity of markets in the new and significantly expanded territory, a strong management group and solid financial underpinning, provide substantial opportunities for continued success.

Management's Discussion and Analysis

This Management's Discussion and Analysis ("MD&A") comments on the operations, performance and financial condition of Toromont Industries Ltd. ("Toromont" or the "Company") as at and for the three months ended March 31, 2018, compared to the preceding year. This MD&A should be read in conjunction with the attached unaudited condensed interim consolidated financial statements and related notes for the three months ended March 31, 2018, the annual MD&A contained in the 2017 Annual Report and the audited annual consolidated financial statements for the year ended December 31, 2017.

The unaudited condensed interim consolidated financial statements reported herein have been prepared in accordance with International Financial Reporting Standards ("IFRS") and are reported in Canadian dollars. The information in this MD&A is current to April 25, 2018.

Additional information is contained in the Company's filings with Canadian securities regulators, including the Company's 2017 Annual Report and 2018 Annual Information Form. These filings are available on SEDAR at www.sedar.com and on the Company's website at www.toromont.com.

<u>Advisory</u>

Information in this MD&A that is not a historical fact is "forward-looking information". Words such as "plans", "intends", "outlook", "expects", "anticipates", "estimates", "believes", "likely", "should", "could", "will", "may" and similar expressions are intended to identify statements containing forward-looking information. Forward-looking information in this MD&A reflect current estimates, beliefs, and assumptions, which are based on Toromont's perception of historical trends, current conditions and expected future developments, as well as other factors management believes are appropriate in the circumstances. Toromont's estimates, beliefs and assumptions are inherently subject to significant business, economic, competitive and other uncertainties and contingencies regarding future events and as such, are subject to change. Toromont can give no assurance that such estimates, beliefs and assumptions will prove to be correct. This MD&A also contains forward-looking statements about the recently acquired businesses.

Numerous risks and uncertainties could cause the actual results to differ materially from the estimates, beliefs and assumptions expressed or implied in the forward-looking statements, including, but not limited to: business cycles, including general economic conditions in the countries in which Toromont operates; commodity price changes, including changes in the price of precious and base metals; changes in foreign exchange rates, including the Cdn\$/US\$ exchange rate; the termination of distribution or original equipment manufacturer agreements; equipment product acceptance and availability of supply; increased competition; credit of third parties; additional costs associated with warranties and maintenance contracts; changes in interest rates; the availability of financing; potential environmental liabilities of the acquired businesses and changes to environmental regulation; failure to attract and retain key employees; damage to the reputation of Caterpillar, product quality and product

safety risks which could expose Toromont to product liability claims and negative publicity; new, or changes to current, federal and provincial laws, rules and regulations including changes in infrastructure spending; and any requirement of Toromont to make contributions to the registered funded defined benefit pension plans, postemployment benefits plan or the multi-employer pension plan obligations in which it participates in and acquired in excess of those currently contemplated. Risks and uncertainties related to the 2017 significant acquisition could also cause the actual results to differ materially from the estimates beliefs and assumptions expressed or implied in the forward-looking statements, including but not limited to: changes in consumer and business confidence as a result of the change in ownership; the potential for liabilities assumed in the acquisition to exceed our estimates or for material undiscovered liabilities in the 2017 acquisition; the potential for third parties to terminate or alter their agreements or relationships with Toromont as a result of the acquisition; and risks related to integration of the acquired operations with those of Toromont including cost of integration and ability to achieve the expected benefits. Readers are cautioned that the foregoing list of factors is not exhaustive.

Any of the above mentioned risks and uncertainties could cause or contribute to actual results that are materially different from those expressed or implied in the forward-looking information and statements included in this MD&A. For a further description of certain risks and uncertainties and other factors that could cause or contribute to actual results that are materially different, see the risks and uncertainties set out in the "Risks and Risk Management" and "Outlook" sections of Toromont's most recent annual Management Discussion and Analysis, as filed with Canadian securities regulators at www.sedar.com or at our website www.toromont.com. Other factors, risks and uncertainties not presently known to Toromont or that Toromont currently believes are not material could also cause actual results or events to differ materially from those expressed or implied by statements containing forward-looking information.

Readers are cautioned not to place undue reliance on statements containing forward-looking information, which reflect Toromont's expectations only as of the date of this MD&A, and not to use such information for anything other than their intended purpose. Toromont disclaims any obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.

CORPORATE RECAP

2017 Acquisition

On October 27, 2017, Toromont completed the acquisition of the businesses and net operating assets of the Hewitt Group of Companies.

As a consequence of this transaction, Toromont became the authorized Caterpillar dealer for the province of Québec, Western Labrador and the Maritimes, as well as the Caterpillar lift truck dealer for Québec and most of Ontario, in addition to the MaK engine dealer for Québec, the Maritimes and the Eastern seaboard of the United States, from Maine to Virginia. Additional distribution rights were also acquired.

This important transaction delivers a substantial growth opportunity, and strengthens the Company's expertise and operations in the mining, construction, power systems, product support and expanded product lines.

For further information on the accounting for the acquisition, refer to note 3 of the notes to the 2017 audited consolidated financial statements, as filed with Canadian securities regulators at www.sedar.com or at our website www.toromont.com.

⁽¹⁾ Described in the sections titled "Additional GAAP Measures and Non-GAAP Measures".

The Company delivered good results in the first quarter on growth in the Legacy Toromont businesses, together with incremental contributions from the acquired businesses ("Toromont QM"), offset by increased interest expense and integration-related costs.

The Legacy Equipment Group reported revenue growth of 3% on increased product support and rentals, which served to offset lower total equipment sales. Toromont QM generated revenues of \$241.4 million for its first full quarter of operations, up 18% from revenues generated in the first quarter of 2017 at the predecessor organization on growth in new equipment and product support. CIMCO reported a 22% increase in revenues with strong package sales offsetting a slight contraction in product support revenues. On a year-over-year comparable basis, revenues grew \$23.2 million or 6%.

Gross profit margins increased 20 basis points ("bps") to 24.6%. Higher margins reported at the Legacy Equipment Group (up 140 bps) were partially offset by lower margins at CIMCO versus a year ago (down 60 bps). Lower average margins experienced at Toromont QM also reduced the total by 60 bps.

Selling and administrative expenses increased \$55.0 million largely reflecting the incremental expenses at Toromont QM (\$51.4 million) and integration-related costs (\$1.7 million). Additionally, at Legacy Toromont, compensation costs were up \$2.4 million on increased headcount, regular annual increases, and an increased profit sharing accrual on the higher earnings. Certain other expense categories such as travel and customer concessions also increased, partially offset by lower mark-to-market adjustments on Deferred Share Units, down \$1.3 million versus a year ago. Legacy Toromont expenses were 40 bps lower as a percentage of revenues (14.8% versus 15.2% last year).

Operating income increased \$11.3 million in the quarter, including \$5.7 million contributed by Toromont QM, net of integration-related costs. Operating income at Legacy Toromont increased \$5.6 million or 15% in the quarter, and was 80 bps higher as a percentage of revenues (10.0% versus 9.2% last year).

Interest expense increased due to acquisition-related financing. During the guarter, the Company

repaid \$150.0 million of the initial \$250.0 million drawn against the term credit facility, resulting in \$0.5 million in unamortized deferred financing costs expensed in the period.

Interest income increased on higher conversions of equipment on rent with a purchase option ("RPO") and higher investment income on higher average cash balances.

The effective income tax rate was 27.6% compared to 27.3% last year. The increase is substantially due to the higher proportion of income earned in the higher tax jurisdictions, although this is expected to be mitigated in coming years as Quebec continues to phase in reductions in the corporate tax rates.

Net earnings increased \$3.8 million or 14% to \$30.8 million while basic earnings per share ("EPS") increased \$0.04 or 12% to \$0.38.

Excluding the impact of Toromont QM, integration-related costs and acquisition-related interest expense, net earnings and increased 19% as identified in the table below.

	Net ea	rni	ngs	%		Basic I	EP:	S ^(a)	%

⁽e) Expenses shown net of taxes

BUSINESS SEGMENT OPERATING RESULTS

The accounting policies of the segments are the same as those of the consolidated entity. Management evaluates overall business segment performance based on revenue growth and operating income relative to revenues. Corporate expenses are allocated based on each segment's revenue. Interest expense and interest and investment income are not allocated.

Equipment Group

	Thre	e m	nonths en	ded	March 3	31
(\$ thousands)	2018		2017	\$	change	% change

Total equipment sales and rentals	328,178		205,158	1	23,020	60%
Power generation	2,596		3,130		(534)	(17%)
Product support	282,197		151,476	1	30,721	86%
Total revenues	\$ 612,971	\$	359,764	\$ 2	253,207	70%
Operating income	\$ 45,795	\$	35,076	\$	10,719	31%
KEY RATIOS:						
Product support revenues as a % of total revenues	46.0%		42.1%			
Operating income margin	7.5%		9.7%			
Group total revenues as a % of consolidated revenues	90.6%		87.3%			

The Equipment Group results reflect good execution amidst challenges across the broader supply chain. Legacy Toromont Equipment Group revenues increased 3% from the first quarter of 2017. Toromont QM contributed \$241.4 million in total revenues in the quarter, which increased 18% from revenues generated in the first quarter of 2017 at the predecessor organization.

New equipment sales in the legacy businesses increased 15% versus last year with strong demand in the construction sector across all of our territories (up 50%), partially offset by decreases in power systems (down 27%), mining (down 5%) and agriculture sales (down 30%). Used equipment sales were down 36% due in part to challenges in sourcing used iron to address the demand together with reduced dispositions of the rental fleet as equipment was retained to support the increased rental demand. Total equipment sales in the legacy businesses were down 2%. Total equipment sales at Toromont QM were \$102.1 million, up 21% from those realized a year ago at the predecessor organization led by increased new equipment sales. More than half of Toromont QM sales went into construction markets, almost a third into mining and power systems markets and the remainder into lift-truck markets.

Rental revenues at the legacy businesses increased 12% versus last year. Momentum in power rentals continued with revenues increasing 100% on heightened demand for uninterrupted power supply/generators, pumps and temperature control units across a wide customer base. Light equipment rentals were up 15% with increases across all regions except Newfoundland, which was impacted by the unexpected shutdown of a major project during the winter months. Both heavy rentals (down 21%) and rental revenues from RPO (down 13%) decreased against a tough prior year comparator that benefited from significant activity in Newfoundland. At Toromont QM, rental revenues were \$18.6 million, which increased 7% from a year ago. Approximately two-thirds of rental revenues at Toromont QM were generated from the light equipment fleet and lift-truck rentals.

The RPO fleet increased to \$66.5 million, including \$14.8 million at Toromont QM.

Product support revenues at the legacy businesses increased 7% in the quarter largely due to good rebuild activity levels, particularly in mining. At Toromont QM, product support, which comprised 50% of total revenues in the quarter, increased 17% versus a year ago.

Gross profit margins increased 90 bps in the quarter versus a year ago. Toromont Legacy margins improved across all revenue streams and a favorable sales mix of product support revenues, to total revenues, further contributed. The average margins at Toromont QM continue to be lower than Toromont legacy, which somewhat offset this growth.

Selling and administrative expenses increased \$55.2 million mainly due to the incremental expenses at Toromont QM (\$51.4 million) and integration-related costs (\$1.7 million). At Legacy Toromont, compensation costs increased \$0.8 million on higher staffing levels to support growth and annual compensation increases. As a percentage of revenues, expenses were 10 bps higher (14.2% versus 14.1% last year), after excluding Toromont QM and integration-related costs.

Operating income was up \$10.7 million or 31% in the quarter, including a contribution of \$5.7 million, net of integration-related costs from Toromont QM. Legacy Toromont operating income increased \$5.0 million or 14% in the quarter and was 10.8% as a percentage of revenues versus 9.7% last year.

Bookings and Backlogs

(\$ millions)	2018	2017	\$ change	% change
Bookings - three months ended March 31	\$ 370	\$ 188	\$ 182	97%
Backlogs - as at March 31	\$ 437	\$ 176	\$ 261	148%

Bookings increased \$182.0 million. In the legacy businesses bookings grew \$25.0 million in the quarter on strong mining (up 36%) and construction orders (up 26%), partially offset by lower power systems orders (down 33%). Toromont QM bookings of \$157.0 million in the quarter reflected good ordering activity across all market segments, almost half of which related to construction and approximately one-third relating to mining and power systems.

Backlogs increased to \$437.0 million, including \$184.0 million at Toromont QM. At March 31, 2018, the total backlog of \$437.0 million related to construction (42%), power systems (24%), mining (21%), agriculture (7%) and lift trucks (6%), most of which is expected to be delivered this year. Backlogs can vary significantly from period to period on large project activities, especially in mining and power, the timing of orders and deliveries and the availability of equipment from either inventory or suppliers.

CIMCO

	Thre	e m	onths en	dec	March 3	31
(\$ thousands)	2018		2017	9	change	% change
Package sales	\$ 35,619	\$	23,315	\$	12,304	53%
Product support	28,238		29,229		(991)	(3%)
Total revenues	\$ 63,857	\$	52,544	\$	11,313	22%
Operating income	\$ 3,420	\$	2,818	\$	602	21%
KEY RATIOS:						
Product support revenues as a % of total revenues	44.2%		55.6%			
Operating income margin	5.4%		5.4%			
Group total revenues as a % of consolidated revenues	9.4%		12.7%			

CIMCO reported good results in the Canadian operations, while US results were softer. Currency translation of US operations did not have a significant impact on trends.

Package revenues reflect the progress of project construction applying the percentage-of-completion method for revenue recognition. This introduces a degree of variability as the timing of projects and construction schedules are largely under the control of third parties (contractors and end-customers). In Canada, package revenues were up 66% on higher industrial (up 56%) and recreational activity (up 117%). All regions reported strong growth. In the US, package revenues increased 11% with higher industrial activity offsetting lower recreational levels.

Product support revenues decreased by 3%. In Canada, product support revenues were down 5%, partially attributable to the inclement weather conditions. In the US, product support revenues were relatively unchanged.

Gross profit margins decreased 430 basis points in the quarter. Higher product support margins (up 80 bps) were more than offset by lower package margins (down 430 bps) and the impact of an unfavorable sales mix of product support revenues to total revenues (down 80 bps). Package margins in the first quarter of 2017 benefitted from good project closeouts and favorable one-time adjustments, not repeated.

Selling and administrative expenses decreased \$0.1 million or 1% in the quarter and were 420 bps lower (18.5% versus 22.7% last year) as a percentage of revenues.

Operating income was up 21% to \$3.4 million, reflecting the higher revenues and lower selling and administrative expense ratio, partially offset by the lower gross margins. Operating income margin was relatively unchanged versus a year ago.

Bookings and Backlogs

(\$ millions)	2018	2017	\$ change	% change
Bookings - three months ended March 31	\$ 60	\$ 63	\$ (3)	(5%)
Backlogs - as at March 31	\$ 157	\$ 138	\$ 19	14%

Bookings in the quarter were down 5%. In Canada, strong industrial orders (up 64%) were partially offset by lower recreational orders (down 30%). In the US, both market segments decreased against record levels last year which included the securing of several large projects.

Backlogs increased \$19.0 million or 14% to \$157.0 million, surpassing the previous first quarter record set last year. In both Canada and the US, industrial backlogs were up with the opposite for recreational. Most of the backlog is expected to be delivered this year.

CONSOLIDATED FINANCIAL CONDITION

The Company maintained a strong financial position. At March 31, 2018, the ratio of net debt to total capitalization was 33%, compared to 40% at December 31, 2017 and 0% at March 31, 2017 (cash exceeded total debt).

Non-Cash Working Capital

The Company's investment in non-cash working capital was \$470.4 million at March 31, 2018. The major components, along with the changes from March 31 and December 31, 2017 are presented in the following table.

	March 31	March 31	Chang	е	De	cember 31		Chang	е
(\$ thousands)	2018	2017	\$	%		2017		\$	%
Accounts receivable	\$ 437,913	\$ 261,793	\$ 176,120	67%	\$	528,748	\$	(90,835)	(17%)
Inventories	865,370	485,575	379,795	78%		780,024		85,346	11%
Other current assets	10,072	6,497	3,575	55%		8,386		1,686	20%
Accounts payable and accrued liabilities	(654,348)	(239,631)	(414,717)	173%		(521,666)	(132,682)	25%
Provisions	(22,837)	(14,453)	(8,384)	58%		(17,436)		(5,401)	31%
Income taxes receivable (payable)	5,165	3,532	1,633	46%		(204)		5,369	nm
Derivative financial instruments	9,252	389	8,863	nm		-5,260		14,512	nm
Dividends payable	(18,633)	(14,907)	(3,726)	25%		(15,655)		(2,978)	19%
Deferred revenues and contract liabilities	(161,506)	(62,754)	(98,752)	157%		(137,129)		(24,377)	18%
Total non-cash working capital	\$ 470,448	\$ 426,041	\$ 44,407	10%	\$	619,808	\$(149,360)	(24%)

Accounts receivable at March 31, 2018 included \$168.9 million at Toromont QM. Accounts receivable were up \$7.2 million or 3% at the legacy businesses.

Accounts receivable at December 31, 2017 included \$42.7 million related to amounts owing to the Company as part of the 2017 acquisition which was collected in the first quarter of 2018. The remaining decrease of \$48.1 million or 9%, was partly due to lower trailing revenues (Q1 2018 revenues were 18% lower than Q4 2017 revenues; a normal seasonal trend) and slower collections.

Inventories at March 31, 2018 included \$326.5 million at Toromont QM. Excluding these, inventories were \$53.3 million or 11% higher compared to March 31, 2017 at the legacy businesses with increases in both Groups:

- Equipment Group inventories increased \$47.2 million or 10% with higher equipment (up \$32.0 million or 9%), service work-in-process (up \$10.7 million or 50%) and parts (up \$4.5 million or 4%).
- CIMCO inventories were up \$6.1 million or 28%, largely reflecting higher work-in-process levels on the timing of project advancement.

In comparison to December 31, 2017, inventories were \$85.3 million or 11% higher with increases in both Groups:

- Equipment Group inventories were \$77.9 million or 10% higher with increases in all categories. Equipment Group inventory levels are typically lowest at the end of the fiscal year due to seasonality, with inventories building during the year in advance of the busy selling period.
- CIMCO inventories were up \$7.4 million or 36% on higher work-in-process for both Canadian and US projects reflecting project construction schedules.

Accounts payable and accrued liabilities at March 31, 2018 included \$225.0 million at Toromont QM. Excluding this, accounts payable and accrued liabilities increased \$189.7 million or 79% reflecting timing of payments and certain favourable transitional terms from suppliers. In addition, the DSU

liability increased on the higher average share price. Compared to December 31, 2017, the increase of \$132.7 million or 25% mainly reflects the timing of payment and terms related to inventory purchases and other supplies, partially offset by the payout of annual performance incentive bonuses.

Provisions at March 31, 2018 increased \$8.4 million or 58%, reflecting higher warranty provisions at the legacy businesses on increased equipment and package sales together with \$6.1 million which related to Toromont QM.

Income taxes receivable (payable) reflects the difference between tax installments and current tax expense.

Derivative financial instruments represent the fair value of foreign exchange contracts. Fluctuations in the value of the Canadian dollar have led to a cumulative net gain of \$9.3 million as at March 31, 2018. This is not expected to affect net income, as the unrealized gains will offset future losses on the related hedged items.

Dividends payable increased compared to March 31 and December 31, 2017 reflecting the higher dividend rate and the higher number of shares outstanding. The quarterly dividend rate was increased 21% from \$0.19 per share to \$0.23 per share effective with the April 2, 2018 dividend payment.

Deferred revenues and contract liabilities represent billings to customers in excess of revenue recognized.

- In the Equipment Group, these arise on sales of equipment with residual value guarantees, extended warranty contracts and other long-term customer support agreements ("CSAs") as well as on progress billings on long-term construction contracts. Excluding \$60.0 million at Toromont QM at March 31, 2018, deferred revenues and contract liabilities in the legacy Equipment Group increased \$20.6 million or 48% versus March 31, 2017, due to increased progress billings for equipment deliveries in the future and progress billings relative to work completed on long-term CSAs.
- In CIMCO, these arise on progress billings in advance of revenue recognition and were up \$18.2 million or 90% at March 31, 2018 versus March 31, 2017, reflecting the strong backlog levels. Compared to December 31, 2017, both the Equipment Group (up \$15.2 million or 14%) and CIMCO (up \$9.2 million or 31%) reported higher deferred revenues and contract liabilities for similar reasons outlined earlier.

Legal and Other Contingencies

Due to the size, complexity and nature of the Company's operations, various legal matters are pending. Exposure to these claims is mitigated through levels of insurance coverage considered appropriate by management and by active management of these matters. In the opinion of management, none of these matters will have a material effect on the Company's consolidated financial position or results of operations.

Outstanding Share Data

As at the date of this MD&A, the Company had 81,034,894 common shares and 2,538,961 share options outstanding.

Dividends

The Company declared and paid the following dividends to common shareholders during the last eight quarters.

Record Date	Payment Date	Dividend Amount per Share	Dividends Paid in Total (\$ millions)
June 10, 2016	July 4, 2016	\$0.18	\$14.1
September 9, 2016	October 3, 2016	\$0.18	\$14.1
December 9, 2016	January 3, 2017	\$0.18	\$14.1
March 10, 2017	April 3, 2017	\$0.19	\$14.9
June 9, 2017	July 4, 2017	\$0.19	\$14.9
September 8, 2017	October 2, 2017	\$0.19	\$14.9
December 8, 2017	January 3, 2018	\$0.19	\$15.4
March 9, 2018	April 2, 2018	\$0.23	\$18.6

LIQUIDITY AND CAPITAL RESOURCES

Sources of Liquidity

Toromont's liquidity requirements can be met through a variety of sources, including cash generated from operations, long-and-short-term borrowings and the issuance of common shares. Borrowings are obtained through a variety of senior debentures, notes payable and committed long-term credit facilities.

The Company maintains a \$500.0 million committed revolving bank credit facility. Debt under the facility is unsecured and ranks pari passu with debt outstanding under Toromont's existing debentures. Interest is based on a floating rate, primarily bankers' acceptances and prime, plus applicable margins and fees based on the terms of the credit facility. The facility includes covenants, restrictions and events of default typical for credit facilities of this nature.

No amounts were drawn on the revolving bank credit facility at March 31, 2018, December 31, 2017 or March 31, 2017. Letters of credit utilized \$24.4 million of the facility (December 31, 2017 - \$26.7; March 31, 2017 - \$22.9).

In March 2018, the Company repaid \$150 million on its committed term bank credit facility, bringing the balance drawn to \$100 million. Unamortized deferred financing costs of \$0.5 million associated with this portion of the term credit facility were expensed during the three month period ending March 31, 2018.

The Company expects that continued cash flows from operations in 2018 together with cash on hand, and available credit facilities will be more than sufficient to fund requirements for investments in working capital and capital assets.

Principal Components of Cash Flow

Cash from operating, investing and financing activities, as reflected in the Interim Condensed Consolidated Statements of Cash Flows, are summarized in the following table:

	Inr	ee monus e	maea	warch 31
(\$ thousands)		2018]	2017
Cash, beginning of period	\$	160,507	\$	188,735

		139,367		(15,990)
Investing activities		35,619		(3,567)
Financing activities		(164,379)		(13,565)
Effect of foreign exchange on cash balances		109		(29)
Increase (decrease) in cash in the period		10,716		(33,151)
Cash, end of period	\$	171,223	\$	155,584

Three months ended March 31

Cash Flows from Operating Activities

Operating activities provided significant cash inflow in the first quarter of 2018 compared to a use of cash in the first quarter of 2017. The higher cash generated from operations reflect the increased cash earnings generated by both the legacy businesses and Toromont QM together. The significant cash inflow from non-cash working capital was mainly due to higher accounts payable and accrued liabilities, and lower accounts receivables, partially offset by higher inventories. Net rental fleet additions (purchases less proceeds of disposition) were higher due to more disposals last year on fleet optimization and relative aging. Additionally, \$2.6 million was spent on growing the Toromont QM fleet.

The components and changes in working capital are discussed in more detail in this MD&A under the heading "Consolidated Financial Condition."

Cash Flows from Investing Activities

During the first quarter, the Company received \$42.7 million related to the final closing working capital adjustment of the 2017 acquisition (refer to note 3 of the notes to the 2017 audited consolidated financial statements for more information).

Investments in property, plant and equipment in the quarter amounted to \$7.1 million (2017 - \$4.2 million), which included \$3.3 million at the acquired locations.

Cash Flows from Financing Activities

To partially fund the acquisition in 2017, the Company drew \$250.0 million against its term credit facility. In the first quarter of 2018, the Company repaid \$150.0 million which largely accounts for the significant use of cash versus the first quarter of last year.

Other uses and source of cash in the guarter were:

- Dividends paid of \$15.4 million or \$0.19 per share (2017 \$14.1 million or \$0.18 per share);
- Repayment of other long-term debt of \$1.0 million (2017 \$0.9 million); and
- Cash received of \$2.0 million on the exercise of stock options (2017 \$1.4 million).

OUTLOOK

The expansion of our territories to include Quebec and Atlantic Canada is expected to be transformative to the long-term performance of Toromont. It provides a substantial growth platform and strengthens our Company by providing a large contiguous operating platform extending across all of Eastern and Central Canada and into the far North. Effective execution will be required to realize on this significant potential which will allow for a greater combined presence in key Canadian economic sectors such as mining, construction and power systems. Focus is currently on safety of our people, customer deliverables, business integration and transition to generate favorable long-term returns.

The Equipment Group's parts and service business continues to provide momentum driven by the larger installed base of equipment working in the field, providing a measure of stability in a variable business environment. The Company continues to hire technicians in anticipation of an increase in demand, including the opportunity for increased equipment rebuilds and readying used iron. Broader product lines, investment in rental equipment, expanding the agricultural business and developing product support technologies supporting remote diagnostics and telematics are expected to contribute to longer-term growth.

The long-term outlook for infrastructure spending continues to be positive across most territories.

Increased activity in the mining space has translated to increased bookings and sales this year and we are cautiously optimistic that there is the opportunity for continued growth. In the meantime, production continues at existing mine sites, generating product support opportunities and incremental equipment to support the operations and expansion. With the substantially increased base of installed equipment, product support activity should continue to grow so long as mines remain active.

CIMCO's strong bookings activity and current backlog levels bode well for future prospects. Increasing long-term product support levels is also a positive signal for future trends. CIMCO has a wide product offering using natural refrigerants including innovative CO₂ solutions, which are expected to contribute to growth. In addition, CIMCO is focused on its growth strategy in the US, which represents a significant market opportunity.

The diversity of the markets served, expanding product offering and services, financial strength and disciplined operating culture position the Company for continued growth in the long term.

QUARTERLY RESULTS

The following table summarizes unaudited quarterly consolidated financial data for the eight most recently completed quarters. This quarterly information is unaudited but has been prepared on the same basis as the 2017 annual audited consolidated financial statements.

(\$ thousands, except per share amounts)		Q2 2017		Q3 2017		Q4 2017	Q1 2018

Interim period revenues and earnings historically reflect variability from quarter to quarter due to seasonality. The acquisition in the fourth quarter of 2017 also affects comparability on a year-over-year basis.

The Equipment Group has historically had a distinct seasonal trend in activity levels. Lower revenues are recorded during the first quarter due to winter shutdowns in the construction industry. The fourth quarter had typically been the strongest due in part to the timing of customers' capital investment decisions, delivery of equipment from suppliers for customer-specific orders and conversions of equipment on rent with a purchase option. This pattern is impacted by the timing of significant sales to mining and other customers, resulting from the timing of mine site development and access, and construction project schedules.

CIMCO has also had a distinct seasonal trend in results historically, due to timing of construction activity. Lower revenues are recorded during the first quarter on slower construction schedules due to winter weather. Revenues increase in subsequent quarters as construction schedules ramp up. This trend can be, and has been, impacted somewhat by significant governmental funding initiatives and significant industrial projects.

Historically, inventories have increased through the year to meet the expected demand for higher deliveries in the third and fourth quarters of the fiscal year. This seasonal sales trend also leads accounts receivable to be at their highest level at year-end.

RISKS AND RISK MANAGEMENT

In the normal course of business, Toromont is exposed to risks that may potentially impact its financial results in either or both of its business segments. The Company and each operating segment employ risk management strategies with a view to mitigating these risks in a cost-effective manner. There have been no material changes to the operating and financial risk assessment and related risk management strategies as described in the Company's 2017 Annual Report.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Accounting Policies

The significant accounting policies used in the preparation of the accompanying unaudited interim condensed consolidated financial statements are consistent with those used in the Company's 2017 audited annual consolidated financial statements, and described in Note 1 therein, except as described in Note 1 to the unaudited interim condensed consolidated financial statements for the three month period ending March 31, 2018.

Estimates

The preparation of financial statements in conformity with IFRS requires estimates and assumptions that affect the results of operations and financial position. By their nature, these judgments are subject to an inherent degree of uncertainty and are based upon historical experience, trends in the industry and information available from outside sources. Management reviews its estimates on an ongoing basis. Different accounting policies, or changes to estimates or assumptions could potentially have a material impact, positive or negative, on Toromont's financial position and results of operations. There have been no material changes to the critical accounting estimates as described in Note 2 to the Company's 2017 audited annual consolidated financial statements, contained in the Company's 2017 Annual Report.

RESPONSIBILITY OF MANAGEMENT AND THE BOARD OF DIRECTORS

Management is responsible for the information disclosed in this MD&A and the accompanying consolidated financial statements, and has in place appropriate information systems, procedures and controls to ensure that information used internally by management and disclosed externally is materially complete and reliable. In addition, the Company's Audit Committee, on behalf of the Board of Directors, provides an oversight role with respect to all public financial disclosures made by the Company, and has reviewed and approved this MD&A and the accompanying consolidated financial statements. The Audit Committee is also responsible for determining that management fulfills its responsibilities in the financial control of operations, including disclosure controls and procedures and internal control over financial reporting.

Disclosure Controls and Procedures

Management, under the supervision of the President and Chief Executive Officer ("CEO") and Executive Vice President and Chief Financial Officer ("CFO"), is responsible for establishing and maintaining disclosure controls and procedures, as defined in National Instrument 52-109 – Certification of Disclosure in Issuers' Annual and Interim Filings, and have designed such disclosure

controls and procedures, or have caused it to be designed under their supervision, to provide reasonable assurance that material information with respect to Toromont is made known to them.

The CEO and CFO have limited the scope of their design to exclude the disclosure controls and procedures of the businesses acquired on October 27, 2017. The design of the acquired businesses disclosure controls and procedures will be completed for the fourth quarter of fiscal 2018.

Internal Control over Financial Reporting

Management, under the supervision of the CEO and CFO, is responsible for establishing and maintaining adequate internal control over financial reporting, as defined by National Instrument 52-109 – *Certification of Disclosure in Issuers' Annual and Interim Filings*, and have designed such internal control over financial reporting, or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements in accordance with IFRS.

There have been no significant changes in the design of the Company's internal controls over financial reporting during the three month period ended March 31, 2018 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

The CEO and CFO have limited the scope of their design and evaluation of the Company's internal control over financial reporting to exclude the internal control over financial reporting of the businesses acquired on October 27, 2017. The acquired businesses contribution to the overall consolidated financial statements of Toromont for the three months ended March 31, 2018 was approximately 36% of consolidated revenues and 16% of consolidated net income.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Also, a projection of the evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the financial statement preparation and presentation. Internal controls over financial reporting may not prevent all errors and fraud. A control system, no matter how well conceived or operated, can only provide reasonable, not absolute, assurance that the objectives of the control system are met.

ADDITIONAL GAAP MEASURES

IFRS mandates certain minimum line items for financial statements and also requires presentation of additional line items, headings and subtotals when such presentation is relevant to an understanding of the Company's financial position or performance. IFRS also requires the notes to the financial statements to provide information that is not presented elsewhere in the financial statements, but is relevant to understanding them. Such measures outside of the minimum mandated line items are considered additional GAAP measures. The Company's consolidated financial statements and notes thereto include certain additional GAAP measures where management considers such information to be useful to the understanding of the Company's results.

Gross Profit

Gross Profit is defined as total revenues less cost of goods sold.

Operating Income

Operating income is defined as net earnings before interest expense, interest and investment income and income taxes and is used by management to assess and evaluate the financial performance of its operating segments. Financing and related interest charges cannot be attributed to business segments on a meaningful basis that is comparable to other companies. Business segments do not correspond to income tax jurisdictions, and it is believed that the allocation of income taxes distorts the historical comparability of the performance of the business segments.

	Three months ended March 31							
(\$ thousands)		2018		2017				
Net earnings	\$	30,779	\$	27,024				
plus: Interest expense		8,895		1,832				
less: Interest and investment income		(2,179)		(1,112)				
plus: Income taxes		11,720		10,150				
Operating income	\$	49,215	\$	37,894				

Net Debt to Total Capitalization and Equity

Net debt to total capitalization and equity are calculated as net debt divided by total capitalization and shareholders' equity, respectively, as defined below, and are used by management as measures of the Company's financial leverage.

Net debt is calculated as long-term debt plus current portion of long-term debt less cash. Total capitalization is calculated as shareholders' equity plus net debt.

The calculations are as follows:

	March 31	December 31	March 31
(\$ thousands)	2018	2017	2017
Long-term debt	\$ 743,507	\$ 893,806	\$ 149,875
Current portion of long-term debt	2,010	1,941	1,875
less: Cash	171,223	160,507	155,584
Net debt	574,294	735,240	(3,834)
Shareholders' equity	1,148,788	1,124,727	899,618
Total capitalization	\$ 1,723,082	\$ 1,859,967	\$ 895,784
Net debt to total capitalization	33%	40%	0%
Net debt to equity	0.50:1	0.65:1	 0.00:1

NON-GAAP MEASURES

Management believes that providing certain non-GAAP measures provides users of the Company's consolidated financial statements with important information regarding the operational performance and related trends of the Company's business. By considering these measures in combination with the comparable IFRS measures set out below, management believes that users are provided a better overall understanding of the Company's business and its financial performance during the relevant period than if they simply considered the IFRS measures alone.

The non-GAAP measures used by management do not have any standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other issuers. Accordingly, these measures should not be considered as a substitute or alternative for net income or

cash flow, in each case as determined in accordance with IFRS.

Working Capital

Working capital is defined as total current assets less total current liabilities. Management views working capital as a measure for assessing overall liquidity.

	March 31	December 31	March 31
(\$ thousands)	2018	2017	2017
Total current assets	\$ 1,498,995	\$ 1,477,665	\$ 913,370
less: Total current liabilities	859,334	699,291	333,620
Working capital	\$ 639,661	\$ 778,374	\$ 579,750

Non-Cash Working Capital

Non-cash working capital is defined as total current assets (excluding cash) less total current liabilities (excluding current portion of long-term debt).

	March 31]	December 31	March 31
(\$ thousands)	2018		2017	2017
Total current assets	\$ 1,498,995	\$	1,477,665	\$ 913,370
less: Cash	171,223		160,507	155,584
	1,327,772		1,317,158	757,786
Total current liabilities	859,334		699,291	333,620
less: Current portion of long-term debt	2,010		1,941	1,875
	857,324		697,350	331,745
Non-cash working capital	\$ 470,448	\$	619,808	\$ 426,041

Market Capitalization & Total Enterprise Value

Market capitalization represents the total market value of the Company's equity. It is calculated by multiplying the market price of the Company's share by the total outstanding shares.

Total enterprise value represents the total value of the Company and is often used as a more comprehensive alternative to market capitalization. It is calculated by adding net debt (defined above) to market capitalization.

The calculations are as follows:

	March 31	December 31			March 31
(\$ thousands, except for share price)	2018		2017		2017
Outstanding common shares	81,035		80,950		78,470
x Ending share price	\$ 55.93	\$	55.10	\$	46.53
Market capitalization	\$ 4,532,282	\$	4,460,335	\$	3,651,213
Long-term debt	\$ 743,507	\$	893,806	\$	149,875
Current portion of long-term debt	2,010		1,941		1,875
less: Cash	171,223		160,507		155,584
Net debt	\$ 574,294	\$	735,240	\$	(3,834)
Total enterprise value	\$ 5,106,576	\$	5,195,575	\$	3,647,379

Key Performance Indicators ("KPIs")

Management uses key performance indicators to consistently measure performance against the Company's priorities across the organization. The Company's KPIs include gross profit margin, operating margin, order bookings and backlogs, return on capital employed and return on equity. Although some of these KPIs are expressed as ratios, they are non-GAAP financial measures that do not have a standardized meaning under IFRS and may not be comparable to similar measures used by other issuers.

Gross Profit Margin

This measure is defined as gross profit (defined above) divided by total revenues.

Operating Income Margin

This measure is defined as operating income (defined above) divided by total revenues.

Order Bookings and Backlogs

The Company's order bookings represent equipment unit orders that management believes are firm. Backlogs are defined as the retail value of equipment unit ordered by customers for future deliveries. Management uses order backlog as a measure of projecting future equipment deliveries. There are no directly comparable IFRS measures for order bookings or backlog.

1. DESCRIPTION OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

Corporate Information

Toromont Industries Ltd. (the "Company" or "Toromont") is a limited company incorporated and domiciled in Canada whose shares are publicly traded on the Toronto Stock Exchange under the symbol TIH. The registered office is located at 3131 Highway 7 West, Concord, Ontario, Canada.

Toromont operates through two reportable segments: the Equipment Group and CIMCO. The Equipment Group includes one of the larger Caterpillar dealerships by revenue and geographic territory in addition to industry leading rental operations and an expanding agricultural equipment business. CIMCO is a market leader in the design, engineering, fabrication and installation of industrial and recreational refrigeration systems. Both segments offer comprehensive product support capabilities. Toromont employs over 6,000 people in almost 150 locations.

Basis of Preparation

These interim condensed consolidated financial statements were prepared in accordance with International Accounting Standard ("IAS") 34 - Interim Financial Reporting. Accordingly, these interim condensed consolidated financial statements do not include all disclosures required for annual financial statements and should be read in conjunction with the audited annual consolidated financial statements of the Company for the year ended December 31, 2017.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements were the same as those that applied to the Company's consolidated financial statements as at and for the year ended December 31, 2017.

The interim condensed consolidated financial statements are presented in Canadian dollars and all values are rounded to the nearest thousands, except where otherwise indicated.

These interim condensed consolidated financial statements were authorized for issue by the Audit Committee of the Board of the Directors on April 25, 2018.

The accounting policies adopted in the preparation of these interim condensed consolidated financial statements are consistent with those followed in the preparation of the Company's annual financial statements for the year ended December 31, 2017, except as noted below.

Amendments to Standards Adopted in 2018

Certain amendments to standards that were adopted on January 1, 2018 are noted below.

a) Revenue Recognition

IFRS 15 – Revenue from Contracts with Customers ("IFRS 15"), establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. Under IFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognizing revenue.

As of January 1, 2018, the Company has adopted IFRS 15. The transition to the new standard had no material impact on the measurement or recognition of revenue of prior periods, however, required additional disclosures have been added. The Company elected to apply the standard on a full retrospective basis, whereby the cumulative effect of adoption is applied to the earliest comparative period presented. For the Company, the earliest period presented is the comparative period beginning January 1, 2017. The Company applied certain practical expedients, as permitted by the standard in determining the impact on transition.

The Company's accounting policy for revenue recognition is described below and was determined to be in compliance with the requirements of IFRS 15.

Under IFRS 15, revenue is recognized when a customer obtains control of the goods or services. Determining the timing of the transfer of control – at a point in time or over time – requires judgement.

The Company principally generates revenue from the sale of equipment, rentals, product support and power generation.

Products and Services	Nature, timing and satisfaction of performance obligations and significant payment terms
Sale of Equipment	Revenue is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the equipment and acceptance by the customer. The transaction price is documented on the sales invoice and agreed to by the customer. Payment is generally due at the time of delivery, as such a receivable is recognized as the consideration is unconditional and only the passage of time is required before payment is due.
Sale of Equipment with a Guaranteed Residual Value or Repurchase Commitment	The sale of equipment for which the Company has provided a guarantee to repurchase the equipment at a predetermined residual value is assessed to determine whether the customer has a significant economic incentive to exercise the put option. If there is no significant economic incentive, the sale is recorded as a sale with a right of return. If the customer is determined to have a significant economic incentive, the sale is recorded as an operating lease in accordance with IAS 17 – Leases.
Sale of Power Systems and Refrigeration Packages	The sale of power systems and refrigeration packages involve the design, manufacture, installation and commissioning of longer-term projects under the customer's control and can span from three months to one-year. Revenue is recognized over time, using

	an input method of costs incurred to date as a percentage of total costs to measure progress towards complete satisfaction of the contract. Payment terms are usually based on set milestones outlined in the contract. Periodically, (i) amounts are received in advance of the associated contract work being performed - these amounts are recorded as contract liabilities; and (ii) revenue is recognized without issuing an invoice – this entitlement to consideration is recognized as unbilled receivables. Any foreseeable losses on such projects are recognized immediately in profit or loss as identified.
Equipment Rentals	Revenue is accounted for in accordance with IAS 17 – Leases. Revenue is recognized on a straight-line basis over the term of the agreement. Payment terms are generally 30 days from invoicing.
Product Support	Revenue from product support services includes the sale of parts and performance of service work on equipment. For the sale of parts, revenue is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the part(s). For the servicing of equipment, revenue is recognized at a point in time, when the service is complete and accepted by the customer.
Long-term Maintenance Contracts	Long-term maintenance contracts typically range from one to five years and are customer-specific. These contracts are sold either separately or bundled together with the sale of equipment to a customer. These arrangements cover a range of services from regular maintenance to major repairs. Under IFRS 15, if the sale of equipment and a long term maintenance contract are considered to be bundled, the Company has concluded that there are two separate performance obligations as each of the promises to transfer equipment and provide services is capable of being distinct and separately identifiable. If the sales are bundled, the Company allocates a portion of the transaction price based on the relative stand-alone selling price to each performance obligation. Revenue from maintenance services will continue to be recognised over time, using an input method to measure progress towards complete satisfaction of the service.
Extended Warranty	The Company generally provides warranties for general repairs of defects that existed at the time of sale. As such, most warranties are assurance-type warranties under IFRS 15, which the Company accounts for under IAS 37 - <i>Provisions, Contingent Liabilities and Contingent Assets.</i> Extended warranty may be purchased by a customer at time of purchase of a machine to provide additional warranty coverage beyond the initial one year standard warranty covered by the supplier. Extended warranty generally covers specified components for a term from 3 to 5 years. Under IFRS 15, such warranties are accounted for as service-type warranties and, therefore, are accounted for as separate performance obligations to which the Company allocates a portion of the transaction price based on the relative stand-alone selling price. Revenue is subsequently recognised over time based on the time elapsed.
Power Generation	The Company owns and/or operates power generation plants that

sell electricity and thermal power. Revenue is recognized monthly based on set rates as power is consumed. Payment is due within 30 days of invoicing.
30 days of invoicing.

The disaggregation of the Company's revenues for each reportable segment is disclosed in Note 11.

b) Share-based Payment

Amendments to IFRS 2 – *Share-based payment*, clarify how to account for certain types of share-based payment transactions. The amendments provide requirements on the accounting for: (i) the effect of vesting and non-vesting conditions on the measurement of cash-settled share-based payments; (ii) share-based payment transactions with a net settlement feature for withholding tax obligations; and (iii) a modification to the terms and conditions of a share-based payment that changes the classifications of the transaction from cash-settled to equity-settled.

The amendments were effective for annual periods beginning on or after January 1, 2018. Adoption of these amendments had no impact on the Company's financial position or net earnings.

c) Financial Instruments

IFRS 9 - Financial Instruments ("IFRS 9") replaces IAS 39 - Financial Instruments: Recognition and Measurement ("IAS 39") for annual periods beginning on or after January 1, 2018. IFRS 9 includes classification and measurement of financial assets and financial liabilities, a forward-looking 'expected loss' impairment model and a substantially-reformed approach to hedge accounting. The Company has applied IFRS 9 retrospectively, with the initial application date of January 1, 2018. As permitted by the transitional provisions of IFRS 9, the Company elected not to restate comparative figures or note disclosures. Any adjustments to the carrying amounts of financial assets and liabilities at the transition date are to be recognized in the opening retained earnings of the current period, however, the Company assessed that no adjustments to the carrying amounts of financial assets and liabilities were required upon adoption of IFRS 9.

The adoption of IFRS 9 has resulted in changes in the Company's accounting policies for recognition, classification and measurement of financial assets and liabilities and impairment of financial assets.

Trade receivables

Trade receivables are carried at amounts due, net of impairment for estimated expected credit loss ("ECL").

Financial assets and liabilities

Financial assets and liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. All financial liabilities are subsequently measured at amortized cost using the effective interest method or at fair value through profit or loss ("FVTPL"). Financial liabilities are classified as FVTPL when the financial liability is (i) contingent consideration of an acquirer in a business combination, (ii) held for trading, or (iii) it is designated as FVTPL.

For financial liabilities that are designated as FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized in other comprehensive income ("OCI"), unless the recognition of the effects of changes in the liability's credit risk in OCI would create or enlarge an accounting mismatch in the consolidated statements of income. The remaining amount of change in the fair value of liability is recognized in the consolidated income

statements. Changes in fair value attributable to a financial liability's credit risk that are recognized in OCI are not subsequently reclassified to the consolidated income statements; instead, they are transferred to retained earnings upon derecognition of the financial liability.

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held for trading, or (iii) it is designated as FVTPL, are subsequently measured at amortized cost using the effective interest method.

Classification and subsequent measurement

Appropriate classification of financial assets and financial liabilities is determined at the time of initial recognition or when reclassified on the consolidated statements of financial position. From January 1, 2018, the Company has applied IFRS 9 and classifies its financial assets and liabilities in the following measurement categories:

- (i) Amortized cost:
- (ii) Fair value through other comprehensive income ("FVTOCI"); or
- (iii) FVTPL.

Impairment

IFRS 9 requires a forward looking ECL model as opposed to an incurred credit loss model under IAS 39. The amount of ECL is updated at each reporting period to reflect changes in credit risk of the respective financial instrument.

In applying the ECL model, one of the following three approaches can be used:

- (i) General approach, which would be applied to most loans and debt securities;
- (ii) Simplified approach, which will be applied to most trade receivables; or
- (iii) Purchased or originated credit-impaired approach.

As the Company's financial assets are substantially made up of trade receivables, the Company has opted to use the simplified approach for measuring the loss allowance at an amount equal to lifetime ECL. The simplified approach does not require the tracking of changes in credit risk, but instead requires the recognition of lifetime ECLs at all times. Lifetime ECL represents the ECL that would result from all possible default events over the expected life of a financial instrument.

The Company considers the following as constituting an event of a default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable.

- (i) when there is a breach of financial covenants by the customer; or
- (ii) information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Company, in full.

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- (i) significant financial difficulty of the customer;
- (ii) a breach of contract, such as a default discussed above; or
- (iii) it is becoming probable that the borrower will enter bankruptcy or other financial reorganization.

Derivatives and Hedges

Derivative financial arrangements are used to hedge exposure to fluctuations in exchange rates. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

At inception, the Company designates and documents the hedge relationship, including identification of the transaction and the risk management objectives and strategy for undertaking the hedge. The Company also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items.

The Company has designated certain derivatives as cash flow hedges. These are hedges of firm commitments and highly probable forecast transactions. The effective portion of changes in the fair value of derivatives that are designated as a cash flow hedge is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in the consolidated income statements. Additionally:

- If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset, the associated gains or losses that were recognized in other comprehensive income are included in the initial cost or other carrying amount of the asset;
- For cash flow hedges other than those identified above, amounts accumulated in other comprehensive income are recycled to the consolidated income statements in the period when the hedged item will affect earnings (for instance, when the forecast sale that is hedged takes place);
- When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss in other comprehensive income remains in other comprehensive income and is recognized when the forecast transaction is ultimately recognized in the consolidated income statements; and
- When a forecast transaction is no longer expected to occur, the cumulative gain or loss that
 was reported in other comprehensive income is immediately recognized in the consolidated
 income statements.

d) Foreign Currency Transactions and Advance Consideration

IFRIC 22 - Foreign Currency Transactions and Advance Consideration, clarifies the appropriate exchange rate to use on initial recognition of an asset, expense or income when advance consideration is paid or received in a foreign currency.

The new interpretation was effective for annual periods beginning on or after January 1, 2018. Management has determined that the new standard does not have a material impact on the Company's financial position.

Standards Issued But Not Effective

A number of new standards and amendments to standards have been issued but are not effective for the financial year ended December 31, 2018, and accordingly, have not been applied in preparing these interim condensed consolidated financial statements.

a) Leases

IFRS 16 – *Leases*, introduces new requirements for the classification and measurement of lessees. For lessors, there is little change to the existing accounting in IAS 17 - *Leases*.

The new standard is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted, provided the new revenue standard, IFRS 15, has been applied, or is applied at the same date. The Company is currently assessing the impact of adopting this new standard on its consolidated financial statements. Management expects that IFRS 16 will result in higher non-current assets and non-current liabilities recorded on the consolidated statements of financial position.

b) Uncertainty over Income Tax Treatments

IFRIC 23 - *Uncertainty over Income Tax Treatments*, provides guidance when there is uncertainty over income tax treatments including (but not limited to) whether uncertain tax treatments should be considered separately; assumptions made about the examination of tax treatments by tax authorities; the determination of taxable profit, tax bases, unused tax losses, unused tax credits, and tax rates; and, the impact of changes in facts and circumstances.

The new interpretation is effective for annual periods beginning on or after January 1, 2019. The Company is currently assessing the impact of the new interpretation on its consolidated financial statements.

2. PROPERTY, PLANT AND EQUIPMENT AND RENTAL EQUIPMENT

Activity within property, plant and equipment and rental equipment included:

	Three months ended March 31					
		2018		2017		
Additions				_		
Rental equipment	\$	34,828	\$	27,608		
Property, plant and equipment		7,114		4,235		
Total Additions	\$	41,942	\$	31,843		
Disposals - NBV						
Rental equipment	\$	3,462	\$	4,765		
Property, plant and equipment		49		147		
Total Disposals - NBV	\$	3,511	\$	4,912		
Depreciation included in:						
Cost of goods sold	\$	26,553		17,148		
Selling and administrative expenses		5,416		1,684		
Total Depreciation	\$	31,969	\$	18,832		

3. LONG-TERM DEBT

	March 31	December 31		March 31
	2018	2017		2017
7.06%, \$15.0 million, due March 29, 2019 (1)	\$ 2,010	\$ 2,963	\$	3,884
3.71%, \$150.0 million, due September 30, 2025 (2)	150,000	150,000		150,000
3.84%, \$500.0 million, due October 27, 2027 (2)	500,000	500,000		-
Senior debentures	652,010	652,963		153,884
\$250.0 million term credit facility due on October 27, 2022 ⁽³⁾	100,000	250,000		-
	752,010	902,963		153,884
Debt issuance costs, net of amortization	(6,493)	(7,216))	(2,134)
Total long-term debt	\$ 745,517	\$ 895,747	\$	151,750
Less: current portion of long-term debt	(2,010)	(1,941))	(1,875)
Non-current portion of long-term debt	\$ 743,507	\$ 893,806	\$	149,875

⁽¹⁾ Blended principal and interest payments payable semi-annually through to maturity.

All debt is unsecured.

The Company maintains a \$500.0 million committed revolving credit facility which matures in October 2022. Debt under the facility is unsecured and ranks pari passu with debt outstanding under Toromont's existing debentures. Interest is based on a floating rate, primarily bankers' acceptances and prime, plus applicable margins and fees based on the terms of the credit facility.

In March 2018, the Company repaid \$150.0 million on its committed term credit facility. Unamortized deferred financing costs of \$0.5 million associated with this portion of the term credit facility were expensed in the period and recorded within interest expense on the interim condensed consolidated income statement.

No amounts were drawn on the revolving credit facility at March 31, 2018, December 31, 2017 or March 31, 2017. Letters of credit utilized \$24.4 million of the facility at March 31, 2018 (December 31, 2017 - \$26.7 million and March 31, 2017 - \$22.9 million).

4. SHARE CAPITAL

Normal Course Issuer Bid ("NCIB")

No shares were purchased under the NCIB program during the three months ended March 31, 2018 and 2017.

Dividends

The Company paid dividends of \$15.4 million or \$0.19 per share during the three months ended March 31, 2018 (2017 - \$14.1 million or \$0.18 per share).

The quarterly dividend was increased on February 22, 2018, to \$0.23 per share effective with the dividend paid on April 2, 2018.

⁽²⁾ Interest payable semi-annually, principal due on maturity.

⁽³⁾ Interest payable monthly, principal due on maturity.

5. FINANCIAL INSTRUMENTS

Financial Assets and Liabilities – Classification and Measurement

Financial assets and financial liabilities are measured on an ongoing basis at cost, fair value or amortized cost, depending on the classification. The following table highlights the carrying amounts and classifications of certain financial assets and liabilities:

	March 31	De	ecember 31	March 31
	2018		2017	2017
Other financial liabilities:				
Current portion of long-term debt	\$ 2,010	\$	1,941	\$ 1,875
Long-term debt	743,507		893,806	149,875
Derivative instruments - cash flow hedges:				
Foreign exchange forward contracts	\$ 9,252	\$	(5,260)	\$ 389

Fair Value of Financial Instruments

The fair value of derivative financial instruments is measured using the discounted value of the difference between the contract's value at maturity based on the contracted foreign exchange rate and the contract's value at maturity based on the comparable foreign exchange rate at period end under the same conditions. The financial institution's credit risk is also taken into consideration in determining fair value. The valuation is determined using Level 2 inputs which are observable inputs or inputs which can be corroborated by observable market data for substantially the full term of the asset or liability, most significantly foreign exchange spot and forward rates.

The fair value and carrying value of long-term debt is as follows:

	March 31	Dece	ember 31	March 31
Long-term debt	2018		2017	2017
Fair value	\$ 758,180	\$	917,583	\$ 155,099
Carrying value	752,010		902,963	153,884

The fair value was determined using the discounted cash flow method, a generally accepted valuation technique. The discounted factor is based on market rates for debt with similar terms and remaining maturities and based on Toromont's credit risk. The Company has no plans to prepay these instruments prior to maturity. The valuation is determined using Level 2 inputs which are observable inputs or inputs which can be corroborated by observable market data for substantially the full term of asset or liability.

During the three month period ended March 31, 2018, there were no transfers between Level 1 and Level 2 fair value measurements.

Derivative Financial Instruments and Hedge Accounting

Foreign exchange contracts and options are transacted with financial institutions to hedge foreign currency denominated obligations related to purchases of inventory and sales of products. As at March 31, 2018, the Company was committed to USD purchase contracts with a notional amount of \$482.2 million at an average exchange rate of \$1.2654, maturing between April 2018 and June 2019. As at March 31, 2018, the Company was also committed to USD sell contracts with a notional amount of \$46.1 million at an average exchange rate of \$1.2563, maturing between May 2018 and March 2019.

Management estimates that a gain of \$9.3 million (December 31, 2017 – loss of \$5.3 million; March 31, 2017 – gain of \$0.4 million) would be realized if the contracts were terminated on March 31, 2018. Certain of these forward contracts are designated as cash flow hedges, and accordingly, an unrealized gain of \$1.9 million (December 31, 2017 – unrealized loss of \$2.3 million; March 31, 2017 – unrealized gain of \$0.2 million) has been included in other comprehensive income. These gains are not expected to affect net income as the gains will be reclassified to net income within the next fifteen months and will offset losses recorded on the underlying hedged items, namely foreign-denominated accounts payable. Certain of those forward contracts are not designated as cash flow hedges but are entered into for periods consistent with foreign currency exposure of the underlying transactions. A gain of \$7.4 million (December 31, 2017 – loss of \$3.0 million; March 31, 2017 – gain of \$0.2 million) on forward contracts not designated as hedges is included in net income which offsets losses recorded on the foreign-denominated items, namely accounts payable.

6. INTEREST INCOME AND EXPENSE

The components of interest expense were as follows:

	Three months ended March 31					
	2018					
Term loan facility	\$	486	\$	253		
Senior debentures		7,898		1,579		
Interest accretion on repayment of term bank debt		511		-		
	\$	8,895	\$	1,832		

The components of interest and investment income were as follows:

	Three months ended March 31					
	2018					
Rental conversions	\$ 1,005	\$ 456				
Other	1,174	656				
	\$ 2,179	\$ 1,112				

7. EARNINGS PER SHARE

	Three months ended March 31					
		2018		2017		
Net earnings available to common shareholders	\$	30,779	\$	27,024		
Weighted average common shares outstanding Dilutive effect of stock option conversion		80,976,397 910,193		78,433,827 787,439		
Diluted weighted average common shares outstanding		81,886,590		79,221,266		
Earnings per share: Basic Diluted	\$ \$	0.38 0.38	\$ \$	0.34 0.34		

For the three months ended March 31, 2018 and March 31, 2017, no share options were considered anti-dilutive (exercise price in excess of market price).

8. STOCK BASED COMPENSATION

A reconciliation of the outstanding options was as follows:

	2018		2017	
		Weighted		Weighted
		Average		Average
	Number of	Exercise	Number of	Exercise
	Options	Price	Options	Price
Options outstanding, January 1	2,628,036 \$	34.85	2,430,871 \$	29.25
Exercised (1)	(85,075)	22.95	(71,625)	20.05
Forfeited	-	-	(15,500)	31.63
Options outstanding, March 31	2,542,961 \$	35.24	2,343,746 \$	29.51
Options exercisable, March 31	1,038,161 \$	26.41	859,431 \$	23.38

⁽¹⁾ The w eighted average share price at date of exercise for the three months ended March 31, 2018 w as \$56.25 (2017 - \$45.47).

The following table summarizes stock options outstanding and exercisable as at March 31, 2018.

	Opti	Options E	ker	cisable			
		Weighted	d Weighted				Weighted
		Average		Average			Average
		Remaining		Exercise			Exercise
Range of Exercise Prices	Number	Life (years)		Price	Number		Price
\$17.10 - \$23.40	624,731	2.9	\$	21.01	537,841	\$	20.62
\$23.41 - \$26.79	419,500	6.3	\$	26.52	227,660	\$	26.52
\$36.65	482,540	7.3	\$	36.65	179,420	\$	36.65
\$39.79	501,640	8.3	\$	39.79	93,240	\$	39.79
\$53.88	514,550	9.4	\$	53.88	-	\$	-
	2,542,961	6.7	\$	35.24	1,038,161	\$	26.41

Deferred Share Unit Plan

A reconciliation of the DSU plan was as follows:

	2018		2017			
	Number of		Number of			
	DSUs	Value	DSUs	Value		
Outstanding, January 1	426,279 \$	23,417	407,731 \$	17,265		
Units taken or taken in lieu and dividends	11,993	661	15,060	661		
Redemptions	(4,478)	(243)	(17,389)	(778)		
Fair market value adjustment	-	183	-	1,528		
Outstanding, March 31	433,794 \$	24,018	405,402 \$	18,676		

The liability for deferred share units is recorded in accounts payable and accrued liabilities.

9. EMPLOYEE FUTURE BENEFITS

Employee future benefits expense included the following components:

	Three months ended March 31				
	201	8	2017		
Defined benefit plans	\$ 4,42	0 \$	495		
Defined contribution plans	3,35	8	3,042		
401(k) matched savings plans	7	9	71		
Total employee future benefits expense	\$ 7,85	7 \$	3,608		

10. SUPPLEMENTAL CASH FLOW INFORMATION

	2018	2017
Net change in non-cash working capital and other		
Accounts receivable	\$ 48,157	\$ 1,102
Inventories	(85,346)	(49,818)
Accounts payable and accrued liabilities	130,660	5,682
Provisions	5,401	(1,641)
Deferred revenues	24,406	11,619
Income taxes receivable	(5,369)	(4,794)
Other	(14,862)	(1,267)
	\$ 103,047	\$ (39,117)
Cash paid during the period for:		
Interest	\$ 1,832	\$ 3,135
Income taxes	\$ 17,033	\$ 15,232
Cash received during the period for:		
Interest	\$ 1,913	\$ 962

11. SEGMENTED INFORMATION

The Company has two reportable segments: the Equipment Group and CIMCO as described above in note 1, each supported by the corporate office. These segments are strategic business units that offer different products and services, and each is managed separately. The corporate office provides finance, treasury, legal, human resources and other administrative support to the segments and does not meet the definition of a reportable operating segment as defined in IFRS 8 – *Operating Segments*, as it does not earn revenue.

The accounting policies of each of the reportable segments are the same as the significant accounting policies described in the most recent annual audited consolidated financial statements.

Segment performance is assessed based on operating income, which is measured differently than income from operations in the consolidated financial statements. Corporate overheads are allocated to the segments based on revenue. Income taxes, interest expense, interest and investment income are managed at a consolidated level and are not allocated to the reportable operating segments. Current taxes, deferred taxes and certain financial assets and liabilities are not allocated to the segments as they are also managed on a consolidated level.

The aggregation of the operating segments is based on the economic characteristics of the business units. These business units are considered to have similar economic characteristics including nature of products and services, class of customers and markets served and similar distribution models.

No reportable segment is reliant on any single external customer.

The following tables set forth information by segment for the three months ended March 31, 2018 and 2017:

	Equipment Group			CIMCO		<u>Consolidated</u>					
Three months ended March 31	2018		2017		2018		2017		2018		2017
Equipment/package sales	\$ 258,804	\$	159,724	\$	35,619	\$	23,315	\$	294,423	\$	183,039
Rentals	69,374		45,434		-		-		69,374		45,434
Product support	282,197		151,476		28,238		29,229		310,435		180,705
Power generation	2,596		3,130		-		-		2,596		3,130
Total revenues	\$ 612,971	\$	359,764	\$	63,857	\$	52,544	\$	676,828	\$	412,308
Operating income	\$ 45,795	\$	35,076	\$	3,420	\$	2,818	\$	49,215	\$	37,894
Interest expense									8,895		1,832
Interest and investment income									(2,179)		(1,112)
Income taxes									11,720		10,150
Net earnings			•		•		•	\$	30,779	\$	27,024

Operating loss from rental operations was \$0.2 million for the three months ended March 31, 2018 (2017 – \$1.4 million).

12. BUSINESS ACQUISITION IN 2017

On October 27, 2017, the Company acquired the businesses and net operating assets of the Hewitt Group of Companies and became the approved Caterpillar dealer for the province of Québec, Western Labrador and the Maritimes, as well as the Caterpillar lift truck dealer for Quebec and most of Ontario and the MaK engine dealer for Québec, the Maritimes and the Eastern seaboard of the United States from Maine to Virginia. Additional distribution rights were also acquired in this transaction. The acquisition expands the Company's Eastern operations into a contiguous territory covering all of Eastern and Central Canada extending into the far North and provides a platform for long-term growth opportunities and diversification into new markets.

The Company acquired the businesses and net operating assets of Hewitt in exchange for consideration of \$902.9 million cash (net of a final closing working capital adjustment) plus the issuance of 2.25 million Toromont common shares (\$121.2 million) for a total consideration of \$1.02 billion. Toromont funded the cash portion of the acquisition through cash on hand, the issuance of long-term senior debentures and drawings on an unsecured term credit facility.

The acquisition has been accounted for using the purchase method of accounting.

Final valuations of certain items are not yet complete due to the inherent complexity associated with valuations of this nature and the timing of the acquisition. Therefore, the purchase price allocation remains preliminary and subject to further adjustments on completion of the valuation process. The updated preliminary purchase price allocation as at March 31, 2018 is as follows:

Accounts receivable	\$ 159,539
Inventories	291,035
Property, plant and equipment	216,755
Rental equipment	169,993
Deferred tax asset	2,617
Intangible assets with an indefinite life:	
Distribution network	345,989
Intangible assets with a finite life:	
ERP system	10,000
Customer relationships	14,731
Other	4,243
Accounts payable and accrued liabilities	(127,124)
Provisions	(6,045)
Deferred revenues	(51,503)
Post-employment benefit obligations	(91,555)
Net identifiable assets	938,675
Residual purchase price allocated to goodwill	85,434
Total	\$ 1,024,109

13. SEASONALITY OF BUSINESS

Interim period revenues and earnings historically reflect seasonality. For the Equipment Group, the first quarter is typically the weakest due to winter shutdowns in the construction industry while the fourth quarter has consistently been the strongest quarter due to higher conversions at the Caterpillar dealership of equipment on rent with a purchase option. For CIMCO, the fourth quarter tends to be the strongest due to higher activity in recreational markets in advance of the winter recreational season.
